Office Action Comments	10/656,586	HUANG ET AL.			
Office Action Summary	Examiner	Art Unit			
	Jeffrie R. Lund	1792			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
 Responsive to communication(s) filed on <u>27 October 2008</u>. This action is FINAL. 2b) This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i>, 1935 C.D. 11, 453 O.G. 213. 					
Disposition of Claims					
4) Claim(s) 1-3,5 and 21-36 is/are pending in the 4a) Of the above claim(s) is/are withdrav 5) Claim(s) is/are allowed. 6) Claim(s) 1-3,5 and 21-36 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or	vn from consideration.				
Application Papers					
9) The specification is objected to by the Examine 10) The drawing(s) filed on 04 August 2006 is/are: Applicant may not request that any objection to the conference of the c	a) accepted or b) objected drawing(s) be held in abeyance. See on is required if the drawing(s) is objected	e 37 CFR 1.85(a). jected to. See 37 CFR 1.121(d).			
Priority under 35 U.S.C. § 119					
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1, 2, 21-28, and 31-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Masuda et al, US Patent Application Publication 2002/0000197, in view of Schriever, US Patent 4,085,661, and Ohta, US Patent 4,526,132.

Masuda et al teaches a vapor deposition processing apparatus 1 that includes a process chamber 16 having a vertical chamber wall defining a chamber interior 14, a showerhead 12 having a lateral surface engaging the chamber wall provided in the process chamber. (Figures)

Masuda et al differs from the present invention in that Masuda et al does not

teach that: the showerhead is held by a plurality of lateral fasteners extending through the chamber wall, each fastener includes a fastener head and threaded shank, and the fasteners structurally isolated from the chamber interior.

Schriever teaches a cylinder wall 3 which forms a chamber, a plurality of lateral fasteners 8 extending through the cylinder wall 3 and attaching an arcuate locking segments 4. Each fastener includes a fastener head and threaded shank, and the fasteners are structurally isolated from the chamber interior.

Ohta teaches the use of lateral screws 52 to attach a gas source 37 to a chamber wall 30. (Figure 2 and 3)

The motivation for attaching the showerhead of Masuda et al with the lateral screws of Schriever is to provide a method of mounting the showerhead of Masuda et al (i.e. an interior part having a lateral surface engaging the chamber wall) as required by Masuda et al but not described and as taught by Ohta. Furthermore, it has been held that applying a known technique to a known device ready for improvement to yield predictable results is obvious (see *KSR International Co. v. Teleflex Inc.*).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to attach the showerhead of Masuda et al using a plurality of lateral fasteners as taught by Schriever and Ohta.

4. Claims 3, 5, 29, 30, 35 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Masuda et al, Schriever, and Ohta, as applied to claims 1, 2, 21-28, and 31-34 above, and further in view of Lilleland et al, US Patent 6,073,577.

Masuda et al, Schriever, and Ohta differ from the present invention in that they

do not teach a gas mixing plate and confinement ring.

Lilleland et al teaches an apparatus that includes: a showerhead 14 with a gas mix plate 22; and a confinement ring 17. (Figure 1, column 2 line 22 through column 3 line 14)

The motivation for adding a mixing plate and confinement ring of Lilleland et al to the apparatus of Masuda et al, Schriever, and Ohta is to more uniformly distribute the processing gas.

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to add the gas mixing plate and confinement ring of Lilleland et al to the apparatus of Masuda et al, Schriever, and Ohta.

Response to Arguments

- 5. The Applicant's amendments to claims 1, 24, and 31 have overcome the rejections of record.
- 6. Applicant's arguments with respect to claims 1-3, 5, and 21-36 have been considered but are most in view of the new grounds of rejection.

Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art all teaches using screws or bolts to attach elements inside a chamber by passing the screw or bolt through the chamber wall and entering the item to be attached.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrie R. Lund whose telephone number is (571) 272-

1437. The examiner can normally be reached on Monday-Thursday (10:00 am - 9:00

pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Parviz Hassanzadeh can be reached on (571) 272-1435. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
